Whle I think Bill Gates is too arrogant by far,the country does itself a disservice by continuig this Jihad against MSFT.If it wern`t for Windows the PC industry would never have had its explosive growth.

To me it seems impossible to have predatory,anti-competitive pricing on an operating system on one hand and gouging of the consumer on the other.

By the way I own no shares in MSFT,and haven`t for several years.

Austin Troy
